

Commercial WATER HEATING.

Tankless Rack System (TRS) and Common Vent

- 15,200 to 4.9 million BTU systems available; 327:1 turn down ratio
- Modular flexible design for easy installation, commissioning & maintenance - inside or out
- TRS can be ordered, built, and shipped fully-assembled to any location in the United States and Canada
- Available with individual concentric venting or Rinnai's new Common Vent for fewer penetrations
- A single Common Vent supports vent runs up to 100 feet for up to 1.39 million BTU (7 units) or up to 41 feet for 1.59 million BTU (8 units) on a single system - multiple common vents can be used

WHY RINNAI TRS?

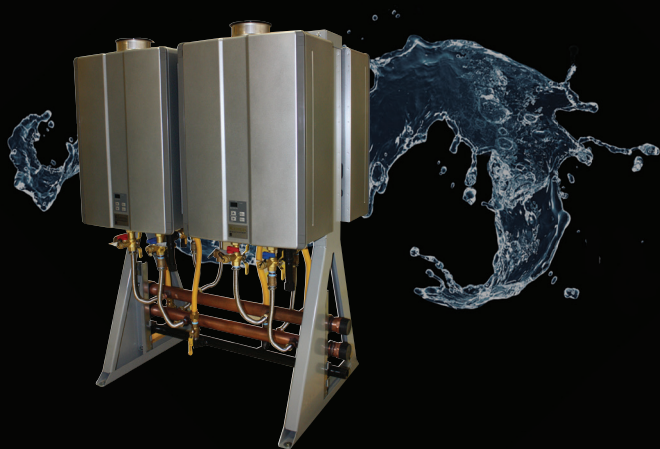

- Reduction in energy consumption saves on operational costs
- Proven reliability
- Right-sizing with industry-leading redundancy that's built-in

WHY RINNAI?

- Leading manufacturer of gas appliances
- Established in 1920
- 24/7/365 Technical Support
- Free Engineering Application Sizing from Rinnai personnel
- State-of-the-art laboratory and in-house CSA testing
- National wholesale distribution and installer network

WHAT INDUSTRIES?

Hospitality, Healthcare, Multi-family, Education, Food Service, Military, Office, Institutional, etc.

Can we provide a Rinnai solution for your next project?
Rinnai will size your project and provide you a Commercial Sizing Report with Piping Diagram – free of charge!
