

Fabricated Steel Saddles Styles FS202 and F202

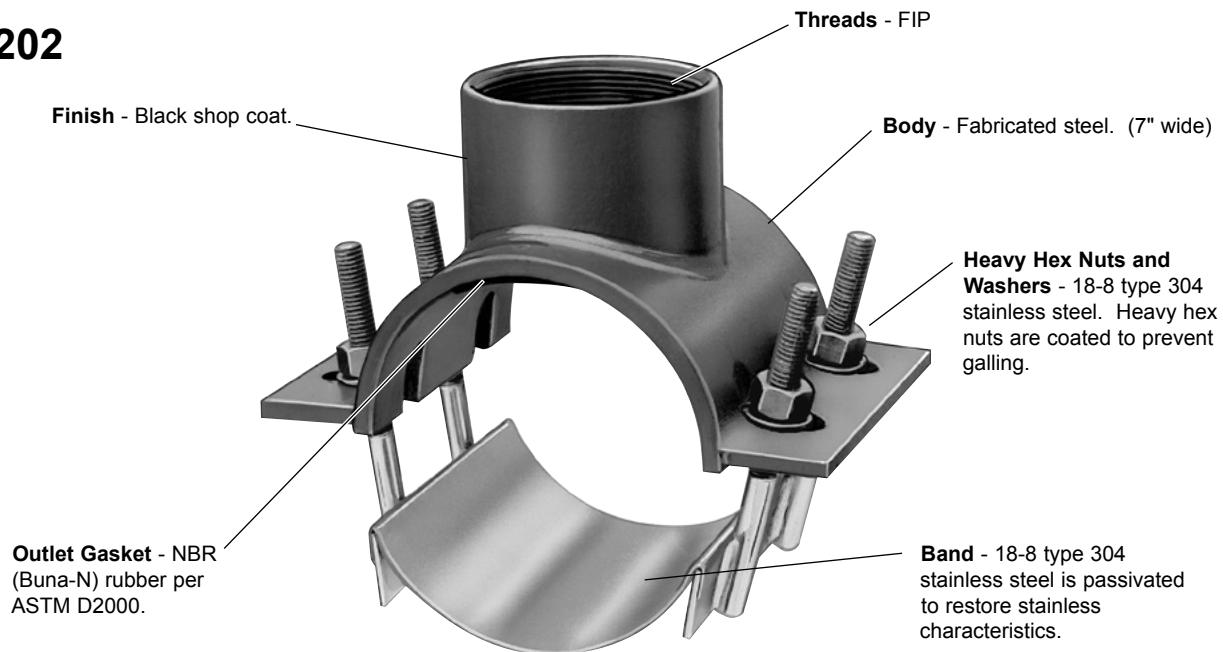

For 3" and 4" Taps

Ford Fabricated Steel Saddles are specifically designed and manufactured for applications requiring a 3" and 4" iron pipe service tap. These products are available with an 18-8 type 304 stainless steel band or with zinc plated C1010 steel straps. Ford fabricated steel saddles have a 150 psi working pressure rating, dependent upon the use of industry standard support and backfill practices.

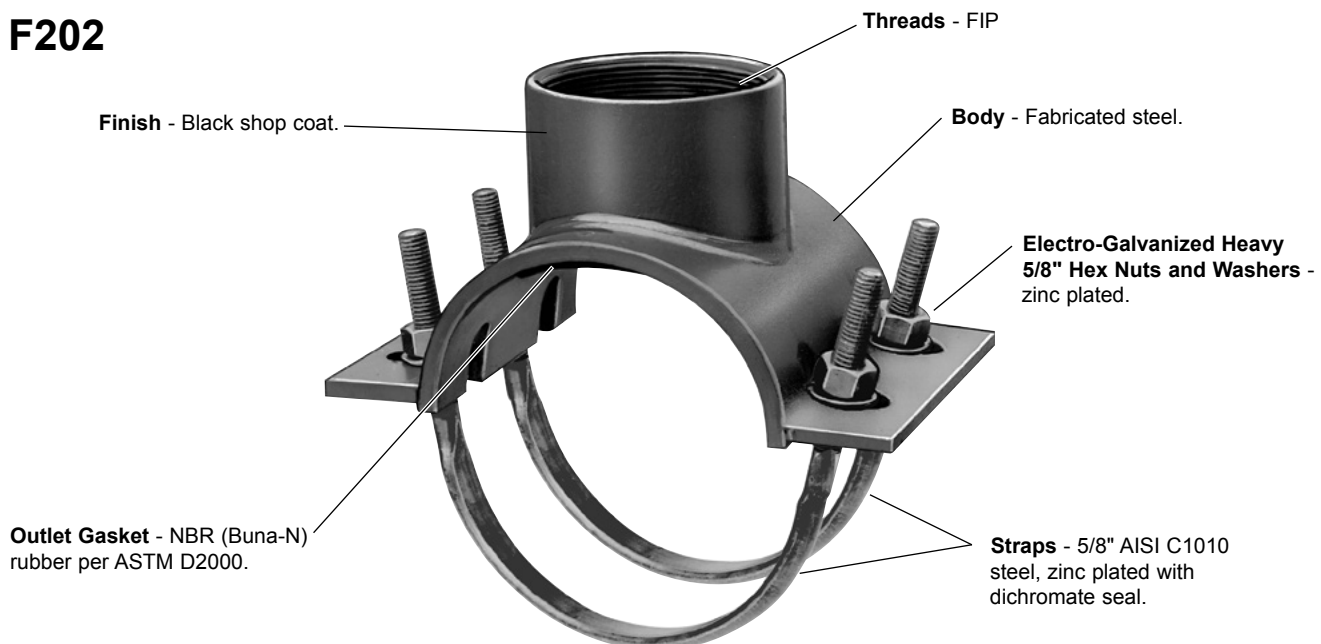

Ford recommends special fabricated FTS tapping sleeves for air release or vacuum valve applications above 150 psi. Contact Ford Meter Box customer service for more information.
