

# Check Valve

- Simple Proven Design
- No-Slam Operation
- Drip Tight Shut Off
- Dual Speed Control
- No Packing Glands or Stuffing Boxes
- Available in a Variety of Materials

The Cla-Val Model 81-02/681-02 Check Valve is a hydraulically operated No-Slam Check Valve with dual speed controls. This valve opens when the pressure at the inlet exceeds the discharge pressure. A gradual rate of opening prevents sudden opening surges. When a pressure reversal occurs the higher downstream pressure is applied to the cover chamber through the control tube lines, and the valve closes drip tight.

This valve is ideally suited for use where a positive shutoff is required. The rubber disc assures tight sealing even if the fluid contains grit or other small-size particles. The simple packless design insures reliable operation and freedom from leaks.

Note: The effectiveness of this valve is related to pipeline velocity. We recommend a maximum flow based on pipeline velocity of 6 feet per second. If pipeline velocities exceed 6 feet per second, consideration should be given to adding a Cla-Val Model 50-01 Pressure Relief Valve or a Cla-Val Model 52 Series Surge Control Valve to the system.

## Schematic Diagram

| Item | Description                      |
|------|----------------------------------|
| 1    | Hytrol (Reverse Flow Main Valve) |
| 2    | CGA Angle Valve (Closing)        |
| 3    | CNA Needle Valve (Opening)       |
| 4    | CSC Swing Check Valve            |

## Typical Applications

### Deep Well Pump

This valve should be an integral part of any well designed pumping system. It is used to prevent damaging and sometimes expensive flow reversal.

### Booster Pump

Install on the discharge of booster pumps to prevent return flow into tank when pump is off. Relief valve as shown is good practice to minimize surges when pump stops.

## Model 81-02 (Uses Basic Valve Model 100-01)

### Pressure Ratings (Recommended Maximum Pressure - psi)

| Valve Body & Cover |                 | Pressure Class |         |         |               |
|--------------------|-----------------|----------------|---------|---------|---------------|
|                    |                 | Flanged        |         |         | Screwed       |
| ANSI Grade         | Material        | Standards*     | 150 lb. | 300 lb. | End Details** |
| ASTM A536          | Ductile Iron    | B16.42         | 250     | 400     | 400           |

\* **681-02 is the reduced internal port size version of the 81-02.**

Maximum continuous flow is approx. 6ft/sec (1.8 meters/sec).

For 100-01 basic valves suggested flow calculations were based on flow through Schedule 40 Pipe.

For 100-20 basic valves suggested flow calculations were based on flow through the valve seat.

Installation of a surge control valve is recommended.

\*Flanged End Detail Only

## Pilot System Dimensions (In Inches)

We recommend providing adequate space around valve for maintenance work

## Pilot System Specifications

### Temperature Rating

**Water:** to 180°F. Max.

### Speed Controls

Opening and closing speed controls are standard on the 81-02 and 681-02 Model.

\* **Note:** Advise factory when ordering if valve will not be installed with the main valve stem in a vertical position.

### Materials

#### Standard Pilot System Materials

Fittings: Brass  
Tubing: Copper

#### Optional Pilot System Materials

Pilot Systems are available with optional stainless steel or Monel materials at extra cost.

## When Ordering, Please Specify

1. Catalog No. 81-02 or No. 681-02
2. Valve Size
3. Pattern - Globe or Angle
4. Pressure Class
5. Screwed or Flanged
6. When Vertically Installed \*
