

SPECIFICATIONS

The Air Gap Drain shall primarily provide a physical separation between the relief valve discharge and the drainage system.

The device shall be able to funnel minor relief valve discharges caused by supply pressure fluctuations or minor check valve fouling.

It shall be designed to provide easy installation to drain line and reduced pressure principle backflow preventer.

All parts shall be corrosion resistant and shall be **100% made in the USA.**

The Air Gap Drain shall be manufactured by **CONBRACO INDUSTRIES, INC.**, Matthews, North Carolina.

FEATURES

- Corrosion Resistant
- Easy to install
- Reduces water splashing
- Economical

MATERIALS

Body

40-200-XA, X1, X2 – Cast Brass

40-200-X3 – FDA Approved epoxy-coated carbon steel

Fasteners

300 Series Stainless Steel

Air Gap Drain

40-200 & MODEL RP (4S-200)
