

Product fact sheet

QuietClean™ PU3900

Healthier Indoor Air

Most vacuums stir up dust while cleaning. That doesn't happen with the QuietClean.

Quiet

The QuietClean central vacuum power unit takes the noise out of cleaning.

Never Change a Filter Again

Most vacuums require a new filter every couple of months and a cloud of dust that comes when you replace them.

Talks to You

With most vacuums, the only way you know it's time to empty the collection receptacle or when you have a clogged hose is when the vacuum stops picking up dirt.

Features

- Powerful Cleaning
- Patented Sound-Reducing Technology
- Up to 12,000 Square Feet
- HEPA Filter
- LCD Display

Specifications

Model Number:	PU3650
Dirt Receptacle Capacity (gallons):	4
Power (Airwatts):	600
Rec. Max Sq. Ft. of Home:	8000
Filtration:	Self-Cleaning Triumph™ HEPA
Product Weight (lbs):	28.1
Depth:	14.875
Height:	36.25
Width:	14.875
Warranty (year):	Lifetime Limited
