

Node

Node

Reliable Battery-Powered Control Without the Need of an Electrical Connection

For isolated sites, power-restricted areas, or the special needs of drip zones, the Hunter Node is the smart, reliable solution. The Node mounts to a valve's solenoid quickly and easily, and without screws, drills or additional wires. The unit's solid construction and waterproof exterior ensure it can handle the harsh environment of a valve box. The Node is powered by one or two 9V batteries and provides standard or extended power throughout the season. Along with exceptional reliability, the Node features an easy-to-program LCD screen, the ability to control a Master Valve, and uses standard Hunter controller programming with 3 programs and 4 start times per program. The array of programming options and rugged reliability make the Node a compact, but powerful irrigation controller with the flexibility of battery power.

Features	Models	Specifications	Resources	Support	
- Battery powered - Number of stations: 1, 2, 4, 6 - Type: Fixed - Enclosure: Outdoor - Independent programs: 3 - Start times per program: 4 - Max. station run time: 6 hrs - Manual Cycle - Master Valve operation (available in 2, 4, 6 station models) - Accepts single or double 9 volt batteries for extended battery life - Solenoid wire length up to 100 feet (18 AWG) - Programmable Off - Warranty period: 2 years					
<u>Node Compatible with Solar Panel Kit</u> ^[1]					
<u>Easy Retrieve Memory</u> ^[2]					
<u>Global Seasonal Adjustment</u> ^[3]					

Sensor Compatibility ^[4]

Battery Life Indicator ^[5]

Waterproof Body ^[6]
