SRC Controllers

SRC

For Residential and Light Commercial Systems, the Controller that Sets the Standards for Economy and Versatility

Introducing a controller with the kind of features virtually no other competitively priced controller has. The Hunter SRC brings to the economy end of the scale the kind of sophisticated technology and built-in convenience that was once only available on top-of-the-line products. Imagine...dial programming and a large display for quick set-up...a built-in 365-day calendar clock to accommodate odd/even watering restrictions

(no monthly reprogramming hassles)... a convenient rain sensor bypass circuit...a full three programs, each with four start times. It's all here in this solidly built command center featuring a rugged cabinet that gives the product a polished, professional look. Why pay more to get all of the features you can get right here for a whole lot less? The Hunter SRC is the controller that's setting new standards for economy and versatility.

FEATURES & BENEFITS

- Dial programming**
 Easy program entry for installers and end-users
- 3 programs with multiple start times**
 Accommodates repeat watering requirements, morning, afternoon and evening
- Large LCD display**
 At-a-glance viewing
- 365-day calendar clock**
 Accommodates odd/even watering restrictions, maximum flexibility
- Rain sensor bypass**
 Quick override of rain sensor, no separate switch required
- Wiring compartment with terminal strip**
 Fast installation, extra space to work

SRC: The only thing easier than using it is setting it up

The SRC controller is not only easy to use, it's also easy to install. All you need is a few simple tools and few moments of your time to set up the wall mounting bracket that's included with your controller. We think you'll find the large wiring compartment and handy provision for conduit will also contribute to making this one fast and neat installation.

The solution for outdoor mounting of the SRC controller

With the new MPC cabinet, now you can quickly, easily and safely install a Hunter SRC controller outdoors. Weatherproof and moisture-resistant, this sturdy UL-listed cabinet can accommodate an SRC with ample room to plug in an external transformer, plus all wiring connections are conveniently made in the cabinet. And rest assured, the MPC can be key locked for vandal resistance.

Make your simple and reliable controller even simpler

Now you can make your user-friendly SRC controller even easier to operate with the optional SRR remote control. Imagine the convenience of being able to manually activate any zone from anywhere in a yard — up to 450 feet from the controller. For more information on this handy new option, consult Hunter SRR brochure # LIT-225.

Electrical Specifications

- Transformer input: 120VAC, 60 Hz (plug-in indoor transformer)
- Transformer output: 24VAC, 0.75A
- Station output: 24VAC, 0.3A per station
- Maximum total output: 24VAC, 0.6A, includes master valve circuit
- Battery backup: 9-volt alkaline battery in separate compartment (not included)
- Master valve output: 24VAC, 0.3A
- Overload fuse: 0.75A
- Surge protection: primary MOV-type
- Fail-safe default program: after a prolonged power outage waters each station 10 minutes every day beginning at 8:00 AM
- Rain sensor override compatible with all major brands
- Preset test cycle program “C”

Models

SRC-600i – 6-station, indoor model

SRC-900i – 9-station, indoor model

Dimensions

- Overall height: 8 1/4"
- Width: 8 1/2"
- Depth: 2 1/4"

Operating Specifications

- Station run time: 0-99 minutes in 1-minute increments
- Start times: 4 per day, per program, for up to 12 daily starts
- Day schedule: 7-day calendar or true odd-even programming with 365-day calendar clock
- AM/PM or 24 hour clock option
- Start time stacking
- Simple manual operation
