

# Quik-Price™

Easy to use price list and product information software

---

**Quik-Price™ Software**  
can help you to:

- **Know your costs**
- **Be more productive**
- **Access product information immediately**

Suppliers provide a product database that is easily loaded into the program. They also provide product data files for items in their inventory on a reference CD.

Use Quik-Price to:

- Build a material list complete with pricing
- Generate reports
- Easily open product information data files
- Send orders via Internet, e-mail, fax, or printed hard copy
- Export the material list for use in other programs

*Quik-Price software lets me view my supplier's pricing backed up by manufacturer's data sheets.*

## Search the Database

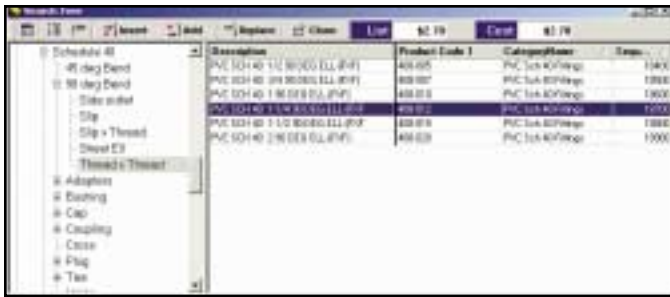

Database search tools are key for ease of use. There are seven ways to locate items for building a material list.

- **Search Tree** — Follow branches on the Search Tree that lead to products supplied by the distributor.
- **Product Categories** — A category search will display all items grouped in the category.
- **Product Code** — Each item can have up to six product codes. Search for items by:
  - Exact product code
  - Beginning characters of the product
  - Characters used in the Product code
- **Description** — An item can have both a primary and secondary description. Search the descriptions by key characters.
- **Combined Search** — A product code or description search may be combined with a category search to narrow results.

# Irrisoft™

P.O. Box 6266 • North Logan, Utah 84341-6266  
Tel 435-755-0400 • Fax 435-755-0415 • [www.irrisoft.net](http://www.irrisoft.net) • [sales@irrisoft.net](mailto:sales@irrisoft.net)

*A Search Tree built around the supplier's inventory makes it easy to find items.*

## Build a material list to price out a job

- Use the search tools to locate the items and then use drag and drop to quickly add items to a project material list
- Enter the needed quantity
- Customer net price is included with the database
- Totals are extended
- Subtotals can be added
- Group products with header text
- Add comment text if needed
- Calculate a sell price based on list or customer net price

#	Quantity	Description	Cost	Total
1	1.0000	1/2" DIA. GALV. STEEL	\$1.00	\$1.00

100	1.0000	1/4" DIA. GALV. STEEL	\$2.00	\$2.00

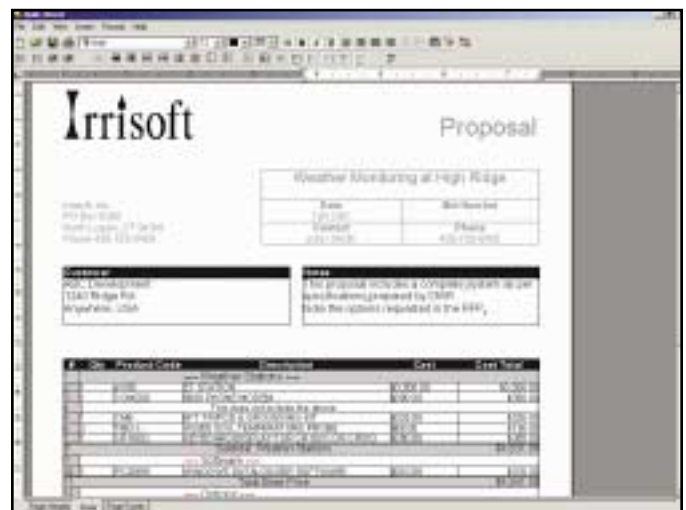

*Quickly put together a material list complete with pricing.*

**Printouts** — Quik-Price lets you generate a printout of the material list. Predefined reports make it easy to get going. Reports may be customized. Use the printout for estimates, quotes, billings, pick lists and purchasing.

**Export** — The price list may be exported for use in other programs such as Microsoft® Excel.

**Purchasing** — Quickly generate a complete purchase order off-line without having to wait for the Internet. Then send the order to the supplier. Quik-Price can send orders via the Internet, e-mail, fax, or printed hard copy.

**Product Information Files** — A distributor can provide manufacturers' product specifications or detailed information in a CD library that can be read using the Adobe Acrobat Reader,® a Web browser, or some other file viewer. The files in the library are linked to products in the database. When an item has a product information file link. A single mouse click will open the file.

*Easily create custom bids, proposals, quotes, or invoices.*
