Products**

www.pwpipe.com

PWPipe exports versatile PVC and polyethylene pipe products worldwide. These products are integral to the infrastructure of new development or existing sites. Strength, corrosion resistance, and smoother flow have made PWPipe a leader in cost-efficient alternatives to metal and concrete for waterworks, irrigation and electrical use.

PWPipe has strategically situated its manufacturing and warehousing facilities on the West Coast, near major seaports.

PWPipe's product line is available for export shipment in standard domestic lengths, or in custom export lengths, specifically manufactured for either twenty-foot or forty-foot length oceanic shipping containers.

Worldwide Shipments for a Global Future

West Coast manufacturing facilities mean convenient, low cost freight to major seaports.

Our container loading capabilities are second to none.

All of this translates into excellent service and competitive landed costs.

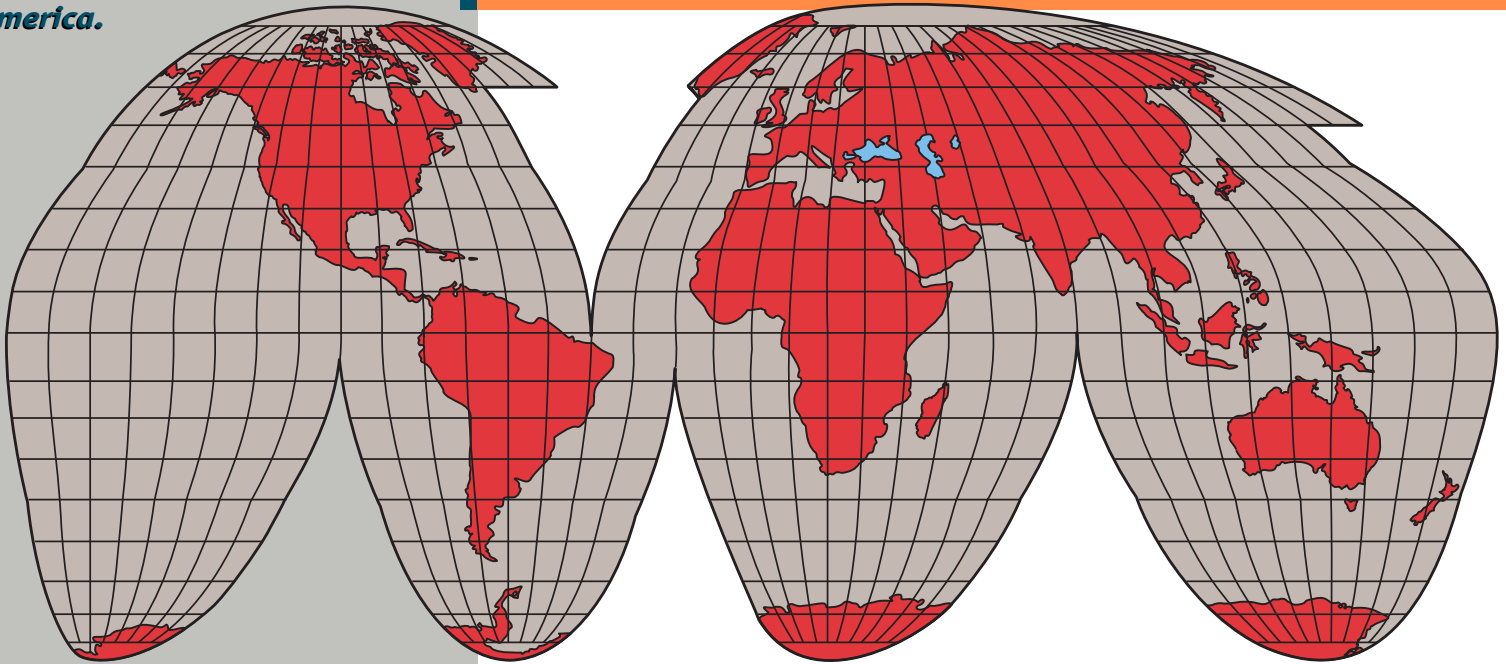

PWPipe Maximizes Your Profitability

by Minimizing Delivery Time and Freight Costs

PWPipe is one of the largest producers of PVC pipe in western North America.

PWPipe combines three decades of success with tomorrow's technology

PWPipe products include PVC and polyethylene pipe and tubing for a variety of applications servicing the potable water, well casing, sewer, agriculture, turf, plumbing, communications, and electrical markets. Our facilities on the West Coast provide easy access to all major seaports, assuring worldwide on-time delivery.

In addition to serving customers worldwide via oceanfreight, our neighbors in Canada and Mexico receive product by truck delivery to points of entry on our shared borders.

Note: PWPipe product specifications and warranties are continually updated. If more than 12 months have passed since the date of this brochure, call your PWPipe representative and ask about changes.
