

# BVS Belt Driven Vent Set - Level I Construction

SWSI Arrangement #10, Class I Construction, Nonoverloading B.I. Wheel

Catalog BVS01-March 2007

VENT SET  
series

The World's Leading Producer of  
**Air Movement Products**

Soler & Palau USA, Div. of Soler & Palau Ventilation Group, certifies that the Models BVS shown herein are licensed to bear the AMCA Seal (except BVS10). The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

**Soler&Palau**  
Ventilation Group

# MODEL BVS - BELT DRIVEN VENT SET

## General

The model BVS is a belt driven arrangement 10, Class I centrifugal fan with high efficiency, backward inclined non-overloading wheel. The self-contained packaged unit (also known as a "vent set" or "utility set") is fully factory assembled to reduce installation costs. Each complete fan is test run prior to shipment to provide smooth, vibration free and consistently reliable operation, and will deliver years of dependable service with minimal maintenance – all in the most economical manner.

A full range of sizes (10 through 36) provides airflow performance from 500 CFM to over 24,000 CFM with static pressure up to 5 in. w.g..

The mechanical design and construction determines the maximum operating speed and power. The performance ranges shown on the following pages comply with the Class I operating limits as defined in AMCA standard 99.

## Application

The belted vent set is an excellent choice for a wide range of exhaust or supply applications in commercial, institutional, or light industrial projects. The packaged unit comes complete with the motor mounted on an adjustable base, v-belt drives, heavy-duty ball bearings, and an integral mounting platform. The installer-friendly design simplifies and reduces the cost of installation.

Typical applications include either supply or exhaust service for ducted systems in schools, theaters, gymnasiums, manufacturing plants, hotels, office buildings, restaurant hoods, and many other general ventilation applications.

The model BVS is suitable for indoor or outdoor installation and with appropriate accessories it can be mounted either on the roof or floor. The model BVS may also be suspended from structure overhead. Ductwork may be connected to the inlet side of the fan, to the outlet, or both.

## Standard Construction and Features

### Housing & Drive Frame Structure

The entire housing is constructed from heavy-gauge galvanized steel for excellent weather resistance. The angle reinforced side sheets are bonded to the fan scroll with a precise lock seam. The flexible design is available in either CW (clockwise) or CCW (counterclockwise) rotation and the housing is field rotatable to various standard discharge positions.

Housing supports, reinforcements, and structural members are formed from heavy-gauge galvanized steel. Robust drive frame members support the motor, shaft and bearings and provide a rigid foundation for the housing assembly.

### Wheel

The backward inclined non-overloading centrifugal wheel is constructed of steel blades welded to the inlet ring and is protected with a durable polyester powder coat finish. Each wheel is statically and dynamically balanced to ISO 1940 and AMCA 204-G2.5 Standards.

### Shaft and Bearings

Turned, ground and polished steel shafts are securely keyed to both the fan wheel hub and the motor sheave. A critical safety factor is provided by designing the shaft first critical speed at least 38% over the maximum operating speed. Standard bearings are heavy duty self-aligning pillow block ball bearings with cast iron housings with minimum L10 life in excess of 100,000 hours.

### Motors

Heavy duty ball bearing motors are factory mounted on an adjustable base for ease of service and belt maintenance. Motor enclosures are available Open Drip Proof (ODP) and Totally Enclosed Fan Cooled (TEFC).

### Drives

V-belt drives are selected for a minimum safety factor of 150% of the driven horsepower. Cast iron motor pulleys are adjustable for final system balancing and are factory set to the required RPM range. Dual groove v-belt drives are standard for motors 5 HP thru 10HP. Three groove v-belt drives are standard on 15HP units.

### Temperature

Standard operating temperature range is -20°F to 300°F. See the VPBI Level 2 Construction literature for 301°F to 600° applications.

## Options and Accessories

Refer to Page 19.

## WARRANTY

**Soler & Palau USA** guarantees this equipment to be free of defects in materials and workmanship for one year from date of shipment. Any units or parts which prove to be defective and are reported during the warranty period will be replaced, exclusive of labor, at our option when returned to our factory, transportation prepaid. Deterioration or wear caused by heat, abrasive action, chemicals, improper installation or operation or lack of normal maintenance shall not constitute defect, and is not covered under warranty.

The motor is warranted by the motor manufacturer for one year. If the motor fails in the warranty period, it should be taken to the nearest authorized motor service station. If this is not done, the motor manufacturer will not warranty the motor. Call the factory for instructions if the authorized motor service station is not found.

**Soler & Palau USA will not be responsible for any installation, removal or reinstallation costs, consequential damages or any unauthorized back charges.**

All specifications are subject to change without notice unless approved in submittal by Soler & Palau USA.

# PHYSICAL DATA

BVS Model	Wheel Diameter (in.)	Wheel Weight (lbs.)	WR <sup>2</sup> (lbs-ft <sup>2</sup> )	Max. Wheel RPM	Max. Motor Frame Size	Fan Weight* (lbs.)
10	10	4	0.600	2998	145T	105
12	12 3/4	11	1.90	2873	145T	143
14	14 1/4	13	3.56	2672	184T	165
16	16	18	5.22	2268	184T	187
18	17 7/8	24	9.73	2137	184T	242

36	35 5/8	147	207.40	1009	254T	880

\*Weight is fan only (without accessories, motors, bases, drives, etc.)

## ELEVATED TEMPERATURE DERATE

When elevated temperatures are encountered, maximum RPMs shown above must be derated according to the following table.

Temperature (°F)	Standard Steel	
70	1.00	Standard Temperature Range
200	0.98	
300	0.96	
400	0.95	
500	0.90	
600	0.86	

High Temperature Range (See VPBI Level 2 Construction literature for 301°F - 600°F applications)

## ROTATION AND DISCHARGE

The direction of rotation is determined from the drive side of the fan. The direction of discharge is determined in accordance with the diagrams below. The angle of discharge is referred to the horizontal axis of fan and designated in degrees above or below such standard reference axis.

Clockwise rotation shown. Counterclockwise is similar but opposite.

## NOTES:

1. Outlet flange is optional for all sizes.
2. Unit rotatable to all positions: 45°, 90°, 270°, 315°, & 360°.
- "CW" rotation is shown: "CCW" rotation is similar but opposite.

Performance certified is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating (BHP) does not include transmission losses.

Soler & Palau USA, Div. of Soler & Palau Ventilation Group certifies that the Models BVS shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Performance certified is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating (BHP) does not include transmission losses.

Soler & Palau USA, Div. of Soler & Palau Ventilation Group certifies that the Models BVS shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Optional - Must be specified

# BVS 27

**Wheel Diameter:** 28-1/4"  
**Outlet Area:** 4.70 Sq. Ft.  
**Average Weight:** 877 lb  
**Shaft Diameter:** 1-3/4"  
**Tip Speed:** 7.40 x RPM=FPM  
**Max Fan RPM:** 1,297 RPM  
**Max Motor HP:** 10 HP

Performance certified is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating (BHP) does not include transmission losses.

Soler & Palau USA, Div. of Soler & Palau Ventilation Group certifies that the Models BVS shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Performance certified is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating (BHP) does not include transmission losses.

Soler & Palau USA, Div. of Soler & Palau Ventilation Group certifies that the Models BVS shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

Soler & Palau USA, Div. of Soler & Palau Ventilation Group certifies that the Models BVS shown herein are licensed to bear the AMCA Seal (except BVS10). The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

UL STANDARD 705  
UL 762

Optional - Must be specified

## OPTIONAL ACCESSORIES

- Gravity Outlet Dampers
- Vibration Isolators - Floor and Hanging
  - either spring or rubber in shear.
- Grease Trough
- Inlet Guard/Screen
- Outlet Guard/Screen
- Inlet Flange
- Outlet Flange
- Weather Cover
- Epoxy Coating
- Access Door
- Drain Fitting
- Electrical Disconnect Switch
  - NEMA1, NEMA3R, NEMA4
- UL705 for Electrical Safety and Reliability
- UL762 for Grease-laden Air Applications
- Shaft Seal
- Two Groove Drive Standard on 5HP thru 10HP
- Three Groove Drive Standard on 15HP Units.

**Soler & Palau (S&P) USA and Canada** are the most recent additions to, and are wholly owned subsidiaries of, Soler & Palau Ventilation Group which was founded in 1951. S&P Ventilation Group is the World's leading supplier of air movement products with an emphasis on developing and producing leading edge products to HVAC and other associated industries.

Over the past 50 years the company has expanded its product ranges and operations within Europe and beyond. Across the globe, S&P has established the most effective means through subsidiaries, distributors and partners for the distribution of our products. Today S&P has facilities in many countries, among these are: Australia, Belgium, China, England, France, Germany, Holland, Italy, Portugal, Mexico, the USA and Canada. Worldwide, S&P is represented by an established and renowned network of distributors and partner companies.

## **PRODUCT DESIGN & DEVELOPMENT**

The innovative research and development of the product, later confirmed by the various stages of calculation, design and testing ensures competitive products, incorporating the most advanced technology.

The team of over 50 engineers and technicians who work exclusively in the R+D (research and development) department, have the most up-to-date technology at their disposal in order to research, design, improve and test S&P products in extreme conditions prior to their launch onto the market

## **MANUFACTURING**

The manufacturing facilities, plant tooling, equipment, and assembly lines, are all selected and studied with great care to ensure a competitive product for sale on both the home and export markets.

## **QUALITY**

From the very outset, innovation together with the quality of the product, has been an irrevocable relationship for S&P.

Every department from research and development, through production, logistics, and distribution, ... to administration, are all totally dedicated to the fundamental principle of quality.

**S&P is an ISO9001 Registered company and has onsite accredited test laboratory facilities.**
