Model TXB Belt Drive Centrifugal Upblast Roof Exhausters

Application

Model TXB belt drive fans are roof mounted centrifugal upblast exhausters rated from 250 to 35,000 CFM with static pressure capabilities to 3-1/4 inches. Soler & Palau USA offers the widest horsepower and CFM selection in the industry. All fans are factory test run for quality assurance. Check our Quickship Program for your rapid delivery requirements.

The TXB was designed with serviceability in mind. The motor compartment can be serviced through the removable top, or the motor housing can be removed by loosening four nuts. Soler & Palau USA's optional "Grease Grabber" is an inexpensive and easy solution to grease containment. The Grease Grabber media allows water to drain away while grease is contained.

Isolation of motor and drive components from the airstream and the high velocity vertical air discharge make the Model TXB ideally suited for the removal of dirty contaminated and/or high temperature air from processes and buildings. Typical applications include restaurant hoods and similar kitchen exhaust ventilation, fume and smoke removal, laboratory fume hood exhaust and chemical process exhaust.

All TXB fans are designed and manufactured for high performance and long life. Soler & Palau USA covers the TXB with a 5 year fan warranty and a 1 year motor warranty. TXB-UL762 units have a 1 year fan and motor warranty. Heavy-gauge materials are used throughout the TXB. The spun inlet and shroud design provide excellent air moving efficiencies. The motor brackets are heavy-gauge steel, and isolated from the unit to eliminate unwanted vibration and noise transmission. For companion direct drive upblast fans, see the Model TXD with its complementing design. There is no finer centrifugal upblast made period.

TYPICAL INSTALLATION

NFPA96 requires a 10 foot minimum distance between the exhaust fan and supply fan intake. The intake extension (optional) provides this clearance. Also required are hinged curb caps on the exhaust fan and some areas require a vented curb extension.

NFPA96 ALTERNATE INSTALLATION

Where space limitations absolutely prevent a 10 foot separation from the air intake, a vertical separation may be permitted with the exhaust outlet being a minimum of 3 feet above any air intake located within 10 feet horizontally.

IMPORTANT: Always check with the authority having jurisdiction to verify local codes and requirements.

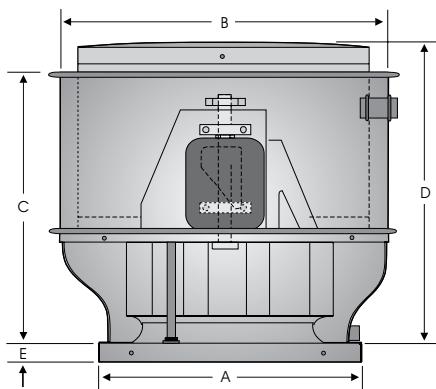

COMMON CURB AND ADAPTOR

The common curb and adaptor allows for mounting both the exhaust fan and supply fans onto one roof opening. Follow the chart below for sizing and ordering common curbs and adaptors.
