Monitor Control Unit

# MCU™

## Monitor Control Unit

Available with SitePro™ CDS, Network LTC™ Plus and Network 8000®, the Monitor Control Unit allows sensor hook-ups to existing, in-field wire paths. This enables the satellite to monitor sensors, such as temperature and pressure, then uploads this data to the central on an as-needed basis or upon request. Alarms are automatically generated when sensor values are out of user-defined compliance.

### Features

- ▶ Built-in temperature and pressure sensor ports
- ▶ Monitors and stores data for up to 6 digital channels (flow, wind, rain, status)
- ▶ Functions are user-defined
- ▶ Automatically uploads collected data to central, as required
- ▶ Automatically generates alarms (message to central) on sensor data
- ▶ Available in green painted, stainless-steel enclosures

### Specifications

- ▶ Stainless-steel cabinet
  - Input power: 1.7 amps @ 115 V a.c., 60 Hz
  - Output power: 24 V a.c., 60 HZ
  - Station output power: 0.75 amps (18 VA)
  - Pump/Master Valve output power: 0.75 amps (18 VA)

### Mechanical Specifications

- ▶ Dimensions:
  - Stainless-steel cabinet  
14" W x 31½" H x 8½" D  
(356 x 800 x 216mm)

### Specifying Information
