

Pocket-PC Remote Irrigation System Manager

Hand-held central control.

- *Fast*
- *Accurate*
- *Fits in the palm of your hand*

In this day and age, time is precious. You don't have time to sort through databases to make changes or adjustments to your irrigation system. There's no time to memorize complex radio commands when manually starting, stopping or holding sprinklers in the field. So we've designed the Toro Prism—the best tool you will ever purchase for your irrigation system. It lets you command all of your important

golf course irrigation operations from the field. No longer do you have to walk up to your satellites to experience true two-way communications. It's fast, accurate and fits in the palm of your hand.

Features

- ▶ Manually start stations, change station percent adjustments or put selected sprinklers on hold
- ▶ Review and adjust all system data
- ▶ Download all changes to your computer
- ▶ View greens, tees, fairways, traps, etc.
- ▶ Select holes and sprinklers

- ▶ Modify sprinkler and satellite symbols
- ▶ Send radio commands (with repeat functions)
- ▶ Save and recall up to 20 user-defined commands
- ▶ Alter all data at once or enter individual changes
- ▶ Modify all hold times or utilize a pop-up calendar
- ▶ One-year NSN support
 - Overnight warranty exchange
 - Toll-free telephone support
- ▶ Voice recorder, mobile address book and calendar capability
- ▶ Works exclusively with Toro SitePro® 2000 with either an OSMAC® or a Network Hand-Held Radio system
