Universal Shrub Check Valve

Just as important as any other part of your system (if not more) are your sprinklers. Don't you think they should run cleanly, have a long life and in the long run, save you water? Isn't that a benefit of having an automatic sprinkler system? We think so too. That's why we've added a universal check valve to some of our popular rotor shrub models—340, XP-300, Super 700, V-1550 and EZ Adjust™ Series.

Though it enhances your shrub sprinklers, you can't see it—it's built inside. You will, however, see the results on the outside in your sprinkler performance and the prolonged life of your system.

*340
Series*

*XP-300
Series*

*Super 700
Series*

*V-1550
Series*

*EZ Adjust
